

MOST AFFORDABLE COOLING SYSTEM

HOW DO YOU **COOL** YOUR HOME?

6 REASONS WHY

1. SAVE UP TO 50-90% ON A/C BILL

Dramatically reduce your A/C runtime by using QuietCool. Enjoy instant cooling comfort in the evening cool hours & induce thermal masscooling throughout the night, all while the A/C is off.

2. EXTEND YOUR A/C & ROOF LIFE

QuietCool reduces the amount of time your A/C is in operation during the year, prolonging its lifespan and the cost to repair or replace your A/C system. QuietCool extract heat out of the roof cavity keeping your home cool

3. INSTANT COOLING COMFORT

QuietCool offers instant cooling relief with powerful breezes. Enjoy the airflow effect where moving air feels 5-10 degrees cooler than still air

4. BALANCE HOME'S CORE TEMPERATURE

Remove heat pockets stored in the roof cavity and induce thermal masscooling. Running QuietCool throughout the night cools the home's thermal core temperature

5. REMOVE ODORS INSTANTLY

Remove unwanted odors in seconds to minutes. Cooking odor, pet dander, bathroom odor, smoke, steam & germs gone! Complete air exchange in 3-4 minutes and 15-20 per hour

6. IMPROVE INDOOR AIR QUALITY

It's widely accepted by air quality experts that the best solution to poor indoor air quality is outside fresh air. Keep indoors fresh all at a whisper with QuietCool.

HOW QUIETCOOL WORKS

- 1 Open a few windows anytime it's cooler outside than inside, typically in the morning and evening.
- 2 Turn your QuietCool fan on by setting the speed and timer.
- 3 QuietCool pulls in cool, fresh air from outside and expels hot, stale air out roof cavity.
- 4 Your home has now been made cooler, healthier, and more comfortable.
